

Fire Risk Assessments

The threat of fire to your property is both real and unthinkable for your business and the people that live and work in the properties you're responsible for.

Fire risk assessments identify the threat of fire and provide recommendations to reduce or remove that risk.

Did you know?

Any UK business with 5 employees or more has an obligation to comply with local fire safety legislation.* To do this they should appoint a Competent Person to:

- Carry out a fire risk assessment identifying any possible dangers and risks.
- Consider who may be especially at risk.
- Provide advice on removal or reduction from fire as far as it's reasonably possible and provide general fire precautions to deal with any possible remaining risk.

How can we help?

Cardinus Risk Management provide residential and commercial fire risk assessments across the UK. Services include an initial fire risk assessment, advice and regular review reporting.

What are the benefits?

- Compliance with relevant fire safety regulations
- Protection for your property and personnel
- Reducing fire risk within your business
